### 1993

### 1994

• **S. Milici and Zs. Tuza**, The spectrum of $\lambda$-times repeated blocks for $TS(v, \lambda)$, *Discrete Mathematics*, **129** (1994), 159-166.

1995

1996

1997

1998

1999

- S.Milici and G.Quattrocchi, Embedding handcuffed designs with block size 2 or 3 in 4-cycle systems, *Discrete Mathematics*, 208/209 (1999), 443-449.

2000

2001

2002

- E.J.Billington and G.Quattrocchi, The metamorphosis of $K_{3,3}$-designs into lambda-fold 6-cycle systems, Ars Combinatoria 64 (2002), 65-80.

- L.Gionfriddo, F.Rania and A.Tripodi, Difference Methods in Design Theory, Quaderni del Seminario Matematico di Brescia, n. 28/02 (2002).

• **S.Milici**, Colouring Steiner triple systems, *Rendiconti del Seminario Matematico di Messina*, Serie II, **XXIV** Supplemento al n. 8 (2002), 113-118.

• **S.Milici and G.Quattrocchi**, On nesting of $G$-decompositions of $\lambda K_n$, where $G$ has four nonisolated vertices or less, *Discrete Mathematics*, **255** (2002), 297-315.

2003

• **G. Quattrocchi**, Embedding handcuffed designs in $D$-designs, where $D$ is the triangle with an attached edge, *Discrete Mathematics*, **261** (2003), 413-434.

2004

• **G. Quattrocchi and Zs. Tuza**, Partition of $C_4$-designs into minimum and maximum number of $P_3$-designs, *Graphs and Combinatorics* **20** (2004), 531-540.

2005

Preprints

- M.Buratti and L.Gionfriddo, Strong difference families over arbitrary graphs, preprint.

- C.J.Colbourn, G.Quattrocchi and V.R.Syrotiuk, Grooming for Two-Period Optical Networks, preprint.

- P.Danziger, E.Mendelsohn and G.Quattrocchi, Resolvable decompositions of \(\lambda K_n\) into the union of two 2-paths, preprint.

- L.Gionfriddo and S.Milici, The number of distinct blocks in \(MPT(v,3)\), *Utilitas Mathematica*, to appear.

- R.E.Jamison and G.Quattrocchi, Partial \(S(k-1,k,v)\) inducing \(P_k\)-decomposition of \(K_v\), preprint.

- L.Milazzo, Zs.Tuza, Class of Steiner systems S(2,4,v), preprint.

- S.Milici, Minimum coverings of the complete graph with 5-cycles, preprint.
• **G. Quattrocchi**, Embedding handcuffed designs into a maximum packing of the complete graph with 4-cycles, preprint.

• **G. Quattrocchi**, Embedding path designs into a maximum packing of $K_n$ with 4-cycles, Utilitas Mathematica, to appear.
