

# WASCOM XXI

Wednesday, June 8 morning,  
Hotel Nettuno

Chairman: Maria Carmela Lombardo

- 09.00** *A theoretical model of Leidenfrost's temperature*  
**Henri Gouin**
- 09.30** *A kinetic description of the body size distributions of species*  
**Giuseppe Toscani**
- 10:00** *Intransigent vs. volatile opinions in a kinetic epidemic model with imitation game dynamics*  
**Marco Menale**
- 10.15** *Vortex leapfrogging in two-dimensional channel*  
**Michele Sciacca**

## 10.30 Coffee Break

Chairman: Andrew Rees

- 11.00** *Separation and transition in boundary layers*  
**Marco Sammartino**
- 11.30** *Boundary layer models for unsteady separation*  
**Francesco Gargano**
- 11.45** *A Rational Extended Thermodynamics description of acceleration waves and oscillating gas bubbles*  
**Francesca Brini**
- 14.30** **Bus departure from Hotel Nettuno for sightseeing tour**
